ANNOUNCEMENTS.

STATE SENATE.
ROBINSON—We are authorized to announce that Mr. T. Robinson is a candidate for State Senator, from the counties of Hopkins and Christian, subject to the action of the Republican party.

BAKER—We are authorized to announce that Mr. B. S. Baker, of Madisonville, as a candidate for State Senator, from the counties of Hopkins and Christian, subject to the action of the Democratic primary, August 22.

FOR MAGISTRATE.
MORRIS—We are authorized to announce that William Morris is a candidate for Magistrate in the Second Magistrate District of Hopkins County, subject to the action of the Democratic primary, August 22.

The fight is to be "off" in November. It hasn't begun yet.

That was a considerable scramble on Monday among the silver Democrats but we'll have 'em guessing worse than that in November.

The fall in the value of silver is disturbing business in Mexico greatly and the indications are that these disturbances may lead to the adoption of the gold standard.

The House sugar rate is written in the tariff bill, not corruptly purchased Senate rate. It is a great victory for right, for justice, and for the people.—New York World (Democratic).

The new tariff cuts very severely into protection granted to the sugar refiners under the Wilson bill.—From "Sugar Trade Journal" (official organ of the American sugar interests).

"If the promise of the harvest fields is fulfilled, it will be hard for theorists to persuade a thriving people that they need monetary panaceas to keep them out of the poor-house.—New York World.

The wheat crop in Kentucky is double that of last year and good in quality as well. Although prices are very much higher than last year the farmer realizes that the outlook is excellent for an advance and is holding it accordingly.

Wheat up and silver down is the rule these days of the Republican administration. Wonder if the farmers of Kentucky would prefer the order reversed or even choose "Coin's" rule, "as goes silver so goes wheat." Compared with the prices of last year where would wheat be "at" under that "rule?"

The case of the farmers has certainly been hard for several years past. It has been a principal cause of discontent and the fruitful mother of wild financial schemes. With that betterment which is now so surely approaching, the occupation of the denagogue and the Utopian dreamer will be gone.—New York World.

The farmers of the United States can now raise herds profitably to make the sugar of the country, and refuse it in the factories where the sugar is made. This is because of the Dingley tariff which has deprived the sugar trust of the special advantages it enjoyed under the Wilson law, and favored the farmer. The sugar trust is not happy.

The conditions certainly seem very favorable this year again for a Republican triumph in Kentucky, and with a good candidate in the field the Republicans will certainly elect the next Clerk of the Court of Appeals. Private ambition should be given no place in the fight this year. Let us have the best man for the place and, losing sight of all factions, work harmoniously for his election and the triumph of the Republican party.

The Miners.

The striking miners are reported as gaining ground in West Virginia. The miners at Odin and Galva, Ill., refused to be influenced by crusaders from other points, and, having no grievance of their own, continue at work. They are still out at Duquoin, and Mt. Vernon, Ill., and marching parties are numerous in Indiana. Funds for strikers are reported very scarce.

Religious Intolerance.

The days of religious intolerance are passed, although "nothing dies so hard and rallies so often as intolerance." In most civilized countries men have generally come to believe that they have no right to deny the right of private opinion in others. That intolerance does still exist and is at times manifest must be denied but the spirit of intolerance belongs to the dark ages.

Rev. Sydney Smith in 1817 thus defined religious toleration: "That a man should hold, without pain or penalty, any religious opinions, and choose for his instruction, in the business of salvation, any guide whom he pleases; care being taken that the teacher and the doctrine injure neither the policy nor the morals of the country." This should be the feeling of every enlightened Christian man, and the conclusion of another writer that "no man is hurt because his neighbor is of a different religion from his own, and no civil society is hurt because its members are of different religions from one another," must inevitably be our conclusion in the search for truth. It is doubtless true that the more varied our beliefs the more likely that a complete view of truth may be reached by the human race.

Are We Public Spirited?

See the advertisement of the great Hopkins County Fair in this issue of THE BEE. If you have not a catalogue already call at THE BEE office and get one. Then see how much you produce or can make that will bear exhibiting, and take it to the Fair. Don't be slow, but show your enterprise and public spirit by doing all you can to help make the exhibit of Hopkins County's resources as creditable as possible. You may know all about what fine corn and tobacco and wheat and grasses and pumpkins and "garden sass" the fertile fields of this wealthy and resourceful county can produce; what splendid coal veins underlie those fertile fields, the immensity of their output, and that the Hopkins county product is about one fourth of the entire output of the State; what splendid housewives occupy our homes and how well they know the arts of comfortable housekeeping, and are endowed with aesthetic taste to make home beautiful; all about our stock and hogs and everything else. But the other fellow don't know and you must tell him by making a creditable display, or else he will be forced to an inevitable conclusion either that the county and its people are very lacking in resources or else that the people are devoid of the public spirit necessary to turn to account the advantages they possess. Let us make both of these conclusions impossible.

LOCOMOTIVE BLASTS.

The Baldwin Locomotive Works of Philadelphia, Pa., has received another order for locomotives from Japan. This time it is for twenty to be used on government railways. This with orders already received, makes a total of fifty for that empire. Thirty have just been shipped, of which eighteen were for the government roads and twelve for a private railroad corporation.

The breaking down of a freight car caused an accident to the railroad train outside of only a short delay to trains and damage to track, little harm was done.

The railroad boys at Lexington took quite an interest in the Democratic primary by supporting their favorites.

Agents Eldridge and Walker attended Court at Elkton Tuesday.

Superior Sullivan and a crew of men are distributing new steel rail this week. The long looked for change of owners of the Ohio Valley road took place this week and the Illinois Central now has complete control. It is rumored that the company will extend the road to Nashville.

That ghost has been caught and now Browder Myers can sleep.

Now the rumor is afloat that Will Mann, night operator at Henderson will be the new agent at Seebree. A better selection could not be made.

Since Agent Telf failed to secure the coveted plum, that of county clerk, he will probably resume work soon at Nortonville for the railroad company again.

T. C. Martin and family are contemplating making a trip to Texas soon to spend a few weeks with relatives there.

None of the railroad men on the Henderson division have yet caught the Alaska fever, and we believe they had rather take their chances on top a box car than run the risk of starving or freezing to death.

It is to be hoped that the Ohio Valley force of men will still be retained by the new management, and not lose out after years of faithful service on that line.

Debs seems to have lost his influence over the strikers, as but few attempts to wreck trains are reported.

President Smith and other L. & N. officials in a special car passed over the L. & N. St. L. last Wednesday.

We understand the Postal Telegraph Company intend building into Henderson soon. It was thought for a while they would get control of wires on the Ohio Valley when that road passed into the hands of the Illinois Central, but as the Western Union owns the wires on that route, they will have a new line to build.

THE STATE CONVENTION.

Preparations Everywhere for a Big Convention to Nominate a Candidate for Clerk of the Court of Appeals.

HOPKINS COUNTY CONVENTION SATURDAY

Half fares have been made over all Railroads in the State and a Good Time Arranged.

Enthusiastic conventions are being held throughout the State by the Republicans who see a great opportunity to elect a Clerk of the Court of Appeals, and good delegates are being selected to attend the big State Convention which meets at Louisville next Tuesday, August 10.

Half fare rates have been secured on all railroads in the State, and a communication to THE BEE from headquarters says "every preparation for a good time has been made." All who have attended a Republican State Convention in Louisville know that this assurance means a sure enough good time, particularly as every delegate will go to the convention with his mind made up to help nominate a good, strong Republican who will send "Sam Shack" into retirement in November.

The Hopkins County Convention, for the purpose of selecting delegates to the State Convention, will be held, as previously announced in these columns, at Madisonville, Saturday, August 7, 2 o'clock p. m. Let every Republican who attends that Convention go with the determination of sending good men only to the State Convention and, losing sight of any real or imaginary personal differences or ambitions of any sort, to act harmoniously for the good of the party in the county and the State, that no man or set of men may become a stumbling block to the success of the whole party.

Conventions have been held in Caldwell, Marion, Madison, Franklin, Pendleton, Henderson, Whitely and many other counties throughout the State and the attendance will be large. The State Convention meets on August 10, at 2 o'clock p. m.

DOWN IN THE MINES.

The first symptoms of a losing fight is when the miners resort to force to carry a point, but if they allow themselves to be led by such men as Debs, violence must be the natural outcome.

Mr. W. C. Wilson is again back at work for the St. Bernard Company and they always find him a ready and reliable man in any position he is called upon to fill.

The Carbondale and Crabtree mines were represented at the moonlight picnic given by the band boys last Saturday.

Without a united effort on the part of coal miners in the United States, they can never expect to win, but such it is safe to say will never be the case as many men refused to be led by unscrupulous leaders, and prefer instead to occupy an independent position.

A large amount of coal was shipped south last week to fill standing orders, which by mutual consent was not shipped on account of the northern and western demand.

The miners of the Democratic faith had it in their power last Monday to aid in selecting good men to make the race for the county offices, and if they neglected to perform that duty the responsibility to a certain extent rests on them.

The Hecla mines of late seem to be in first class shape and that company has been making big shipments of coal daily.

Whatever may be the final result of the coal miners strike, much good has been done in many places in Kentucky. At quite a number of the mines an increase in wages has been granted, while it can be seen the price of coal has advanced, and if the coal handler or the middlemen never, we might say, would agree to sell coal only at a fair price, such as would not only protect themselves and operators the trouble would be over.

Weighted Phillips called on Governor Bradley last week and talked over the question of Assistant Mine Inspector. The Governor treated him with the utmost courtesy and left the impression that Phillips, in the end, would gather the plum, but made no direct promise.

Mr. James Longstaff, son of Thos. Longstaff left last Sunday night for Montana, and he thinks of going to the Alaska gold fields in the spring of next year.

Since it is shown that many die by the wayside, either through exposure or starvation while enroute to the Alaska gold fields, the fever to go there has somewhat abated.

The demand for coal last week was not so great as the week before, yet the miners here and elsewhere in the county run steadily and nearly full handed.

The Barrenly free silver meeting proved that silver when invested in liquor is sometimes the cause of a frenzied fight or row.

The loading of coal at the Woodstock mines was resumed last week with a good force of men at work.

The blockade of railroad yards at East St. Louis last week for a few days by heavy shipments of coal the week before caused quite a decrease in the shipment of that product from here.

Superintendent Salmon, of the Crabtree mines, came over last Sunday and spent the day with friends and relatives here.

Orders for American Goods.

[Broadway.]

It must be gratifying to the members and friends of the Philadelphia Commercial Museum to know that their recent efforts in entertaining the delegates to the United States from the Latin-American countries were not without good results. Professor Wilson, one of the directors of the Museum, is quoted as saying that among the results of the visit of the South American merchants to this country are a government contract that will ultimately involve the expenditure of \$3,000,000, one order in Pittsburgh for \$1,500,000, and a very considerable number of smaller orders for practically every variety of manufactured goods. These orders are with reference to Pennsylvania territory only. Director Wilson does not attempt to estimate the amount or value of orders left at other manufacturing centers throughout New England and the west. He further says that these delegates found goods here that they had been buying from English and German merchants, believing that they were produced in England and Germany. Now that they have discovered they were really American-made goods, they have announced their intention of buying them direct. Several other orders of importance are mentioned as having been placed in this country.

SEEBREE SUNDAY SCHOOLS

Spent a Delightful Day in Lakeside Park and on the Bosom

OF BRAUTIFUL LOCH MARY

The Seebree Sunday Schools had a very delightful day for their outing at Lakeside Park last Thursday. The L. & N. furnished two coaches on train No. 59, through freight, due to leave Seebree at 7:15 a. m.

Four Sunday Schools were here. The Methodist school was represented by about sixty-five teachers and scholars. Mr. J. A. Powell is superintendent of this school. About fifty were here from the Christian Sunday School, Mr. J. W. Springfield, superintendent. The General Baptist School, Mr. W. T. Moore, superintendent, sent about thirty-five persons. About eighty was the number that came from the Missionary Baptist school. Besides these there were a number of others came who did not belong to any Sunday school, so that the total number was no less than three hundred. A gentleman of the party said to THE BEE reporter that he had counted the crowd while in the coaches and that the number would not miss three hundred by five either way.

And they came with provisions enough to feed themselves and many more. The day was perfect. A splendid breeze stirred the shady boughs of Lakeside Park and rippled the clear waters of Loch Mary all day long.

Hammock parties—two at a time—were very popular and numerous and the row boats did not go begging. It was a general good time this happy party had.

The Seebree Cornet Band was along and put life into the picnic and the people with its inspiring strains of music. And then the day was not nearly so hard on them as was the 3d of July when they marched over town in the broiling sun and worked hard all day, all of which resulted in overheating and sickness for several of their number.

The St. Bernard Coal Company made the picknickers a present of a wagon load of watermelons which were much appreciated. Every body seemed to have a good time and to go home in a good humor. The BEE extends a hearty invitation to the good people of Seebree to repeat this pleasant visit and assures them of a hearty welcome at all times.

Pure, rich blood feeds the nerves. That is why Hood's Sarsaparilla, the great blood purifier, cures nervousness.

Western Kentucky is certainly entitled to the Assistant Mine Inspector, and both operators and miners will feel sore if it should go elsewhere.

HOW TO FIND OUT.

Fill a bottle or common water glass with water, and let it stand twenty-four hours, and a sediment or setting indicates a diseased condition of the kidneys. When urine stains linen it is positive evidence of kidney trouble. Too frequent desire to urinate or pain in the back, is also convincing proof that the kidneys and bladder are out of order.

WHAT TO DO.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-root, the great kidney remedy, fulfills every wish in relieving pain in the back, kidneys, liver, bladder and every part of the urinary passages. It corrects inability to hold urine and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to get up many times during the night to urinate. The mild and extraordinary effect of Swamp-root is soon realized. It stands the highest for its most wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists, price fifty cents and one dollar. For a sample bottle and pamphlet, both sent free by mail, mention THE BEE and send your full postoffice address to Dr. Kilmer & Co., Binghamton, N. Y. The proprietors of this paper guarantee the genuineness of this offer.

THE MOST POPULAR TRIP FOR THE SUMMER TO OLD POINT COMFORT AND THE SEASHORE.

MUCH SIGHT-SEEING FOR VERY LITTLE EXPENSE.
